F24300 PLASTIC PROTECTION RUBBER FOR ALUMINIUM MECHANIZED DOORS 08/20

### Components of a door set:

- 4 Profiles cut in 45° angle (one of them will take the mechanized for two hinges).
- Hinges F24304 for mechanized profiles of 20.
- In the profile the protection rubber for a glass of 4 mm. is included.
- 4 Brackets included (not the hinges)
- By default we cut 2mm less in the measure

### By default we mechanize the hinges to 99 mm.

It must be indicated if the measure is correct. It must be indicated if you need other measures or other different hinges we offer the possibility to mechanize any sort of accommodation for the handles profiles, damper, etc. . . . It must be specified in the order.

## ELECTRICAL drawer

### CHARACTERISTICS

- Breaking with the tradition, we innovate in a product with a comfortable electrical opening for a kitchen design modern and minimalist without handles.
- The system PRESS-TO-OPEN answers to a light pressure on any point of the drawer and with a silent and soft way is opened simply and balanced.

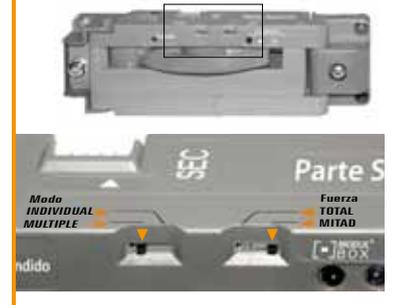

WITH LIGHT PRESSURE  
ON ANY POINT OF THE DRAWER

For drawers upper 60, we advise to assembly two opening mechanisms contiguous. Equally for drawers with a big weight we recommend to assemble two mechanisms in parallel.

## REGULATIONS

## SYNCHRONIZER (Multiple)

Allow to synchronise the opening mechanism.

## System:

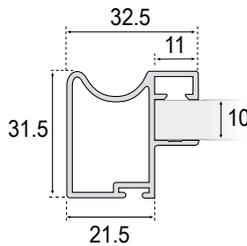

- This system has been designed for wood door assembling, especially laminated or plywood.
- As we have a wide range of aluminium alloy profiles, we can solve any market requirements.  
Then we can propose exclusive and innovative solutions.  
The smooth sliding is due to a especial durable system. The sliding system has been designed to avoid installation difficulties. The sliding system regulation allows to make big door sizes.  
It guarantees an easy assembling.
- The wide range of finishes gives solution for any purpose.

### SLIDING DOORS

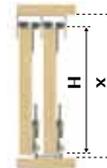

2 DOORS  
3 DOORS  
4 DOORS

### ASSEMBLY FORMULA

#### DOOR HIGH

H = Door high  
x = High clearance of wardrobe

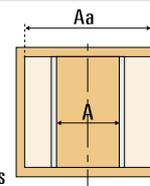

$$H = x - 40$$

The sizes of height and width of closet will be measured in the internal clearance of wardrobe.

#### DOOR WIDTH

A = Door width  
Aa = Width clearance of wardrobe  
N = Number of doors  
D<sub>N</sub> = Constant to subtract or add depending of number of doors

$$A = \frac{Aa - D_N}{N}$$

EXAMPLE:  
MODEL  
HANDLE  
27000

$$A = \frac{1500 - 52,9}{2} = 723,55 \text{ mm.}$$
